INTRODUCING Activated Therapeutics™

Selective formulations with
clinically validated applications

Validated ingredients

Formulated with evidence-based natural ingredients that possess selective biotherapeutic actions for targeted applications

Specific applications

Targeting specific health concerns for which better management can significantly improve patient quality of life, such as menopause, reflux, IBS, and elderly nutrition.

Clinically studied

Providing therapeutic doses of well-researched ingredients to target specific health concerns and improve patient outcomes.

Practitioner-only

Positioned in dispensary to align with service-oriented recommendations by a pharmacist.

Community driven

Listening to the needs of our patient and practitioner communities to formulate products that help healthcare professionals improve their patient care
